3. Probabilistic seismic risk analysis

WANG QIYAO 王启耀

E-Mail: qiyaowang@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/wqy_en/list.htm

Research area or direction

1. Genesis mechanism and prevention of geological disasters (ground fractures, landslides)
 2. Underground engineering monitoring and design
 3. Geotechnical engineering Investigation and design
-

TIAN WEI 田威

E-Mail: tianwei@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/tw_en/list.htm

Research area or direction

1. Research on numerical simulation of geotechnical and hydraulic structures
2. Research on the development and utilization of urban underground space
3. Research on meso-dynamic catastrophe mechanism of geotechnical materials based on CT technology
4. Application of 3D printing technology in geotechnical materials
5. Research on the meso-dynamic catastrophe mechanism and service life prediction of marine concrete in complex environment

ZHANG YAGUO 张亚国

E-Mail: zhangyaguo29@163.com

Homepage: https://js.chd.edu.cn/jzgcxy/zyg100_en/list.htm

Research area or direction

1. Unsaturated Soil mechanics:
The unsaturated seepage; The application of capillary barriers in slope stabilized
2. The geotechnical testing technique

HU ZHIPING 胡志平

E-Mail: huzhping@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/hzp_en/list.htm

Research area or direction

1. Development and utilization of urban underground space
 2. The disaster-causing mechanism and control technology of underground structure in complex geological environment
 3. Optimum design of deep foundation pit and landslide/slope support structure
 4. Dynamic analysis of geotechnical and underground structure
-

KONG DEQUAN 孔德泉

E-Mail: kongdequan@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/kdq_en/list.htm

Research area or direction

1. Optimization design of underground structure
2. Foundation design of new high-rise buildings
3. Underground energy development and utilization
4. Study on mechanical properties and constitutive model of soil
5. Research on protection and restoration of earthen sites
6. Research on reuse of construction waste
7. Development and utilization of new geotechnical materials

LIU QIN 刘钦

E-Mail: chinlau@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/lq105_en/list.htm

Research area or direction

1. Geotechnical testing
2. Tunneling and underground engineering

LIU YUYANG 刘禹阳

E-Mail: Yuyangliu_LYY@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/lyy102_en/list.htm

Research area or direction

The main research direction is the study of the deterioration of the tunnel surrounding rock and the deterioration of the tunnel structure performance under the whole life cycle of the loess tunnel. Specific directions include

1. Research on the evolution of the mechanical properties of loess under dry and wet cycles and water immersion conditions
2. Research on the causes and development mechanism of tunnel lining structure damage during the operation period
3. Multi-scale research on construction hazards during the construction period of loess tunnels
4. Research and development of new structural forms and new construction technologies for loess tunnels

Graduates of tunnel engineering, underground space, geotechnical engineering, civil engineering and other related majors and interdisciplinary disciplines are welcome to apply for exemption or master's degree and join the research team

ZHANG XUN 张勋

E-Mail: zhangxunok@126.com

Homepage: https://js.chd.edu.cn/jzgcxy/zx104_en/list.htm

Research area or direction

- 1.Wind power foundation-structural dynamic catastrophe mechanism and risk control
- 2.Tunnel construction mechanics and deformation control
- 3.Dynamic simulation of compaction parameters of solid waste roadbed filler and intelligent identification of weak areas
- 4.Mechanical properties of concrete containing low-carbon high-performance waste slag

LUO LIJUAN 罗丽娟

E-Mail: luojuan@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/lj101_en/list.htm

Research area or direction

- 1.Geotechnical Engineering
- 2.Slope (Landslide) Engineering
- 3.Pile Foundation Engineering

CHAI SHAOBO 柴少波

E-Mail: shbchai@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/csb100_en/list.htm

Research area or direction

- 1.Wave Propagation across Rock masses
- 2.Dynamic Response of Rock masses

GAO ZHIHUA 高志华

E-Mail: zhgao@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/gzh100_en/list.htm

Research area or direction

- 1.soil mechanics
 - 2.geotechnical engineering
-

WANG RUI 王瑞

E-Mail: wangrui@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/wr3_en/list.htm

Research area or direction

- 1.urban underground space disaster prevention and mitigation
- 2.Subway environmental vibration and shock absorption measures under moving train load
- 3.Dynamic response, long-term settlement and dynamic stability of roadbed under moving train load
- 4.Force-deformation-failure characteristics and disaster reduction measures of cross-fault tunnel structure

JIA NENG 贾能

E-Mail: neng.jia@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/jn_en/list.htm

Research area or direction

Infrastructure, geotechnic, Hydrogeology,hydraulic modelling, clogging in railway and tunnel drainage,soil curing agent, infrastructure etc.

WEI XINSHENG 魏心声

E-Mail: weixsh1213@chd.edu.cn

Homepage: <https://js.chd.edu.cn/jzgcxy/wxs2/list.htm>

Research area or direction

The research directions mainly include the hydro-mechanical properties and models of unsaturated soils, the simulation of initiation and flow processes of water-induced geohazards, the risk early warning theories, and the interaction mechanisms between geotechnical instability flows and structures.

**LI HUI 李慧**

E-Mail: lihui9922@chd.edu.cn

Research area or direction

The discipline team focuses on the key scientific and technological issues in the process of industrialization of new buildings, focusing on the needs of major national, industrial and local development strategies. A large number of scientific and technological research and development, services and product promotion work have been carried out in the fields of light concrete prefabricated structures, carbon fixation and storage of structural components, multi-scale coupling and numerical simulation of advanced building energy saving systems, nanographene biomodified structural materials, high value utilization of solid waste building materials, and high performance and ultra-high performance concrete. The team attaches great importance to the combination of production, university, research and application, in order to promote the transformation of scientific and technological achievements, the construction of a number of pilot bases outside the school, pay attention to theoretical innovation and engineering practice, with research results as the basis, and strive to explore the four-in-one development route of production, university, research and application, has achieved significant economic and social benefits, and has an important influence in the industry.

Homepage: https://js.chd.edu.cn/jzgcxy/xjj100_en/list.htm

Research area or direction

- 1.Low emission pavement material design
 - 2.Recycled pavement material performance
 - 3.Environmental protection functional pavement materials
-

HE JUN 何俊

E-Mail: hejun@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/hj102_en/list.htm

Research area or direction

Novel hybrid FRP structural members, FRP-strengthened concrete/ steel structures, Low-carbon concrete materials

ZHANG DONGFANG 张冬芳

E-Mail: zhangdongfang_2008@163.com

Homepage: <https://js.chd.edu.cn/jzgcxy/zdf/list.htm>

Research area or direction

1. Composite structure and structural strength theory
2. Seismic analysis and seismic structural response analysis

DANG HUIXUE 党会学

E-Mail: dhxlxz@126.com

Homepage: https://js.chd.edu.cn/jzgcxy/dhx_en/list.htm

Research area or direction

Multi-field coupling, multi-disciplinary co-simulation integrated development and secondary development, structural engineering, transmission line mechanics

WANG HAILONG 王海龙

E-Mail: wanghailong@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/whl100_en/list.htm

Research area or direction

Mechanical-chemical reaction coupling

WANG LU 王璐

E-Mail: lwang@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/wl2_en/list.htm

Research area or direction

Elucidating the damage–fracture–failure mechanisms of concrete structures under impact and blast loads, developing an impact/blast simulation framework centered on the meshfree Smoothed Particle Hydrodynamics (SPH) method, and evaluating structural performance and resilience after impact/blast events.

LIANG KUN 梁坤

E-Mail: matkun@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/lk100_en/list.htm

Research area or direction

1. Theoretical system and performance of lightweight aggregate concrete
2. Application of solid waste in concrete
3. Conductive characteristics and application of concrete
4. Concrete durability

BU YONGHONG 卜永红

E-Mail: byh956@126.com

Homepage: https://js.chd.edu.cn/jzgcxy/byh_en/list.htm

Research area or direction

Mainly engaged in the teaching and research of building structure test technology, building structure earthquake resistance, steel-concrete composite structure, village building, building engineering construction, etc. His current research interest is the application of high-strength reinforcement in concrete structures

DUAN LIUSHENG 段留省

E-Mail: duanliusheng@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/dls100_en/list.htm

Research area or direction

- 1.high strength steel structure design theory
- 2.Design theory and engineering application of fabricated structure connection nodes
- 3.Intelligent testing of engineering structure
- 4.industrial plant reinforcement
- 5.Multi-dimensional vibration reduction and isolation technology for complex structures
- 6.combined eccentric support steel frame structure
- 7.large structure test loading device and test technology

LIU YUNXIAO 刘云霄

E-Mail: liuyunxiao@chd.edu.cn

Homepage: https://js.chd.edu.cn/jzgcxy/lyx_en_8182/list.htm

Research area or direction

- 1.High performance and ultra-high performance concrete
- 2.Steel structure and composite structure
- 3.Structural new materials
- 4.Prefabricated construction and materials
- 5.Green building materials
- 6.Application of industrial solid waste in civil engineering

SUN SHANSHAN 孙珊珊

E-Mail: sunjin1986123@163.com

Homepage: https://js.chd.edu.cn/jzgcxy/ssss_en/list.htm

Research area or direction

1. Evaluation of explosion effect and damage of building structure
 2. Strength theory of engineering structure and its application
 3. Basic principle and application of steel-concrete composite structure
-
